

ColdClear™

Lab Sample Request Form

About the trial process

During the development of the ColdClear Technology, we tested a lot of biodiesel and diesel fuel to arrive at the published data we present in our literature. However, we realize that we didn't test your fuel. So, in order to assist our customers in getting the required details needed to inform their decision about which Cold Soak Filtration Solution to choose, we are glad to offer our lab to run your fuel through our ColdClear Technology and provide you a detailed report of the results before and after ColdClear as well as an estimated life expectancy when using your fuel with our technology.

Pricing and Lead time for testing

\$400.00 and shipping to the lab. We will ship the sample back via UPS ground. Funds can be collected Via Wire, Check or CC to [Dexter Biodiesel Solutions](#). \$400 will be refunded if ColdClear does not lower into ASTM specs or \$400 will be credited to the customer upon the purchase of a ColdClear unit.

Shipping instructions

Fax completed form to 724.318.1201 then,
Please ship the following items to our lab (address listed below)

- This completed form and MSDS of your fuel attached to
- 5 gallons of finished fuel in an acceptable, sealed container.

Laboratory address:
Schroeder Biofuels
308 Challis Lane
Sewickley, PA 15143

When sample has been sent please send a confirmation email to info@DexterBiodiesel.com.

Pearland, TX USA
